

Amendments to the Specification:

Please replace the title as follows:

IMAGE FORMING METHOD USING RECYCLED TONER

Please replace the paragraph beginning on page 7, line 19, with the following rewritten paragraph:

Fig. 1 is a schematic view for explaining a method of measuring volume ~~resistivity-resistivity; and~~

Please add the following new paragraph after the paragraph ending on line 20 of page 7:

Fig. 2 is a flow diagram showing an exemplary image forming method.

Please replace the paragraph beginning on page 7, line 22, with the following rewritten paragraph:

The invention resides in an image forming method as shown in Fig. 2 comprising a charging step 21 of charging the surface of a latent image holding member, a latent image forming step 22 of forming an electrostatic latent image on the surface of the latent image holding member, a developing step 23 of forming a toner image from the electrostatic latent image by using a developer, a transfer step 24 of transferring the toner image formed on the surface of the latent image holding member to the surface of a receiving member, a fixing step 25 of heat fixing the toner image transferred to the receiving member and a cleaning step 26 of removing remaining toner on the surface of the latent image holding member, wherein the remaining toner recovered in the cleaning step is reused as recycled toner and the ratio of the recycled toner to the total amount of supply toner supplied to the developer is 15% by weight or greater.
